

ExponentOS

AI Internship Program

Build. Play. Learn.

What is ExponentOS?

ExponentOS is a **free, fully remote, 4-week AI internship** for teenagers aged 15–18 with zero prior coding experience. In 20 sessions, interns go from “What is AI?” to building and publishing their own AI-powered projects in a public portfolio.

Start Date	Duration	Schedule	Daily Time	Format	Ages
11 May 2026	3 Weeks	Mon–Fri	3 Hours	Remote	15–18

The 4-Week Journey

Week	Theme	What You Learn	What You Build
Week 1	AI Explorer	Prompt engineering, AI art, storytelling	AI Exploration Journal
Week 2	AI Builder	No-code chatbots & AI-powered tools	Working Chatbot + AI Tool
Week 3	Code Starter	Python fundamentals through fun projects	Python Project
Week 4	AI Creator	Python + AI APIs, capstone & portfolio	AI App + Portfolio Site

What They Learn

- Prompt engineering & AI literacy
- Building AI apps without code
- Python programming from scratch
- Working with AI APIs (Google Gemini)
- Code review & collaboration
- Portfolio building & self-presentation
- AI ethics, bias & responsible use

What They Walk Away With

- ✓ Public portfolio on GitHub Pages
- ✓ 5 completed AI projects
- ✓ Working knowledge of Python
- ✓ Hands-on AI API experience
- ✓ Badges, XP & certificate of completion
- ✓ Confidence to keep building
- ✓ A community of fellow builders

Every Session Follows This Flow

Kickoff 10 min <i>Recap & warm-up</i>	Learn 40 min <i>Live demos & concepts</i>	Build 50 min <i>Hands-on projects</i>	Play 40 min <i>Challenges & games</i>	Share 20 min <i>Show work & shout-outs</i>
--	--	--	--	---

Gamified Experience: XP Points • 30+ Badges • Leaderboard • Weekly Demo Days • Titles: **Apprentice** → **Builder** → **Hacker** → **AI Creator**

Tools Used (all free)

ChatGPT • Google Gemini • Copilot • Ideogram • Coze • Canva AI • Replit • GitHub Pages • Google Sheets
